

REDJI JEAN BAPTISTE

Ottawa, Ontario

☎ +1 (819)-319-6405 ✉ jean0319@algonquinlive.com <https://redjib.github.io/cyber-portfolio/>

Education

Algonquin College

Sep. 2025 – April 2027

Program: Computer Systems Technician - Networking (1560X03F)

Ottawa, Ontario

Professional Experience

Open Source Contributions

2024 - Present

Contributor (Open Source)

Remote

- Researching and developing deployment strategies for open-source enterprise solutions to replace proprietary software, focusing on cost reduction, data sovereignty, and infrastructure modernization
- Designing integration frameworks for open-source video surveillance platforms including ZoneMinder and Frigate as alternatives to proprietary CCTV systems, enabling enterprises to maintain full control over security infrastructure
- Evaluating and deploying open-source large language models (LLMs) as replacements for hyperscaler AI solutions, implementing self-hosted AI infrastructure to eliminate vendor lock-in and enhance data privacy
- Creating deployment documentation and migration guides for enterprise office suite software including Nextcloud, enabling organizations to transition from proprietary cloud platforms while maintaining collaboration capabilities
- Collaborating with international open-source communities using Git to develop comprehensive technical documentation, contributing to projects that support enterprise adoption of open-source technologies

One King West Hotel & Residence

July 2024 - April 2025

In-House Security Officer

Toronto, Ontario

- Provided comprehensive security services and hotel-level guest assistance in a 51-story luxury hotel environment, serving 400+ residences and hotel guests daily while maintaining 4-star service standards and enforcing hotel policies and regulations
- Operated Avigilon CCTV surveillance system monitoring 80+ IP cameras across multiple building zones, utilizing video analytics for efficient security coverage and investigation support
- Administered HID Global access control infrastructure and VingCard Visionline system to manage all guest, resident, and staff credentials; created, updated, and revoked RFID keycards while maintaining comprehensive audit trails for security investigations
- Utilized VingCard RFID encoder to program, issue, and cancel access cards for guests and staff; produced resident photo ID access cards using PVC card printer integrated with Visionline system
- Conducted access control investigations by reviewing Visionline audit trails to analyze card activity, door events, and access patterns for guests, residents, and staff during security incidents
- Delivered professional concierge-level guest services through security operations, achieving majority positive feedback scores and contributing to the property's reputation for safety and hospitality
- Responded to emergency situations including medical incidents, fire alarms, and security breaches with average response time under 2 minutes; maintained detailed digital incident reports ensuring compliance with legal documentation requirements
- Conducted regular security audits and vulnerability assessments of physical security systems, identifying and addressing potential risks before incidents occurred

Great Canadian Entertainment

December 2022 - April 2023

In-House Security Officer

Pickering, Ontario

- Engaged in security operations in a high-traffic entertainment complex serving 5,000+ daily visitors across gaming floors, restaurants, and event spaces while enforcing casino policies and gaming regulations
- Operated Avigilon Unity/ACC video management and analytics platform with integrated SAFR facial recognition module to monitor persons of interest against watch-lists in real-time for self-exclusion enforcement and cheat detection
- Deployed Avigilon License Plate Recognition (UNITY8-LPR/ACC7-LPR) solution to capture and verify vehicle plates entering and leaving the property, automatically checking against banned vehicle lists and linking footage to investigations
- Leveraged facial recognition and LPR systems to enforce self-exclusion bans, identify known cheaters, restrict unauthorized access to back-of-house zones, and support investigations through audit logs, watch-list alerts, and video evidence
- Coordinated hourly patrols covering 200,000 sq ft of property and monitored 50+ CCTV cameras through Avigilon surveillance infrastructure to ensure comprehensive 24/7 security coverage

- Provided high-level customer service and worked collaboratively in teams to ensure guest and staff safety across the entire property in a high-pressure environment involving alcohol consumption and gaming activities
- Escorted sensitive high-value equipment including chips, cash, and proprietary gaming equipment between back-of-house areas and gaming floor following strict security protocols
- Protected high-value individuals and significant winners by escorting them through designated secure routes within the casino and safely to their vehicles off-site, mitigating robbery and safety risks
- Collaborated with local law enforcement and emergency services for streamlined incident response; de-escalated conflicts and managed crowd control during peak hours, successfully resolving majority of incidents without external intervention
- Implemented and managed security protocols for VIP events hosting up to 1,000 guests, coordinating with event staff to ensure seamless guest experience while maintaining strict security standards

Iron Horse Security & Investigations

September 2020 - December 2023

Security Guard

Ottawa, Ontario

- Provided comprehensive security services across multiple client locations including commercial complexes, construction sites, retail establishments, and public events
- Engaged in security operations for diverse properties ranging from 10,000 to 500,000 sq ft, adapting security strategies to match unique client needs and risk profiles
- Conducted detailed risk assessments and implemented enhanced security protocols that reduced theft incidents across assigned properties
- Utilized advanced surveillance technology including IP camera systems and mobile patrol tracking software to maximize coverage efficiency
- Participated in hours of ongoing security training including crisis management, first aid/CPR certification, de-escalation techniques, and emerging security technologies
- Prepared comprehensive incident reports and maintained detailed activity logs, contributing to successful prosecution of criminal cases
- Developed strong relationships with property managers and tenants, becoming trusted security advisor for multiple long-term clients

Volunteer Experience & Organizations

CyberSci 2025 - Canada's National Cybersecurity Competition

November 2025

Volunteer

Carleton University, Ottawa, Ontario

- Supported logistics and operations for Canada's premier cybersecurity competition featuring regional and national-level capture-the-flag (CTF) challenges
- Assisted with competitor registration, technical setup, and event coordination for participants competing across multiple cybersecurity domains including penetration testing, cryptography, and digital forensics

Algonquin Kali Club

September 2025 - Present

Active Member

Algonquin College, Ottawa, Ontario

- Participating in hands-on cybersecurity training and skill development focused on penetration testing, vulnerability assessment, and ethical hacking using Kali Linux
- Engaging in collaborative learning sessions covering offensive security techniques, network exploitation, web application testing, and digital forensics

Research Interests

Network Security & Intrusion Detection Systems

2024 - Present

- Researching advanced intrusion detection methodologies, anomaly-based threat detection, and real-time network traffic analysis for enterprise environments

Physical Security Systems Integration & Vulnerability Assessment

2024 - Present

- Investigating security vulnerabilities in access control systems, video surveillance platforms, and biometric authentication technologies with focus on IoT security in physical security infrastructure

Additional Information

Languages: English (Fluent), French (Fluent), Haitian Creole (Native)

Technical Skills: Project Management (Agile, Scrum, Kanban, JIRA), Technical Writing (Documentation, Whitepapers, Specifications)

Research Skills: Data Analysis, Survey Design, Literature Review
